Decorate Your Own Seed Packet – Template

Use this template to make your own seed packets! Once you have made them you can decorate them however you like!

You will need:

- Paper – brown or white
- Glue Stick
- Scissors
- Pens, paint, crayons to decorate

Making your seed packet:

1. Cut out the template below or draw your own template to cut out
2. Fold tabs 1 and 2 over on piece 1 and stick down to piece 2
3. Leave to dry
4. Decorate the front of your seed packet – remember to name the packet so that you remember which precious seeds are contained inside
5. Once complete, place your seeds inside
6. You may want to stick down tab 3 to keep your seeds safe whilst in storage

You can change the measurements of the seed packet to make it suitable for your needs. Piece one and two should be the same size and your tabs should be big enough to stick down.
