

Growing a Sunflower

you will need:

- a sunny location
- sunflower seeds
- trowel
- watering can
- flower bed/large soil filled container
- long garden cane

Seeds

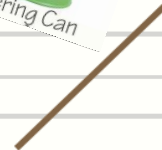

Watering Can

Sun

Cane

What to do

Step One

Plant your sunflower seeds about 2 or 3cm deep and about 15cm apart

Step Two

Water your seeds daily and wait for them to grow!

Step Three

When the seeds emerge move them so that they are about 45cm apart

Step Four

Stick a cane around your best, tallest sunflower!

Louis Says

Did you know that a single sunflower can have up to 2000 seeds?

Louis Says

Did you know that the tallest sunflower recorded was 23ft high!

How Tall is Your Sunflower?

Draw a picture of you standing next to your sunflower in the picture frame!
